THANK YOU FOR CHOOSING ASPEN CHIROPRACTIC & WELLNESS!

INFORMED CONSENT FOR CHIROPRACTIC TREATMENT

The State of Wisconsin requires that every patient be informed of the risks of treatment and the alternatives to treatment prior to the beginning of treatment. The following is Aspen Chiropractic & Wellness informed consent. We intend this consent form to cover the entire course of treatment for your present condition, and for any future conditions for which you seek treatment at this office. The nature of chiropractic treatment: The doctor will use his/her hands or a mechanical device in order to adjust your joints. You may hear a "click or pop," similar to when a joint is "cracked," and you may feel movement of the joint. We perform various ancillary procedures, such as hot or cold packs, traction, as well as exercise instruction. "In this office, we use trained staff personnel to assist the doctor with portions of your consultation, examination, therapy application, exercise instruction, etc. Occasionally, when your doctor is unavailable, another clinic doctor will treat you on that day.

Possible risks and probability: There are inherent risks in any and all treatment delivered by any health care provider, ranging from taking a single aspirin to complicated brain surgery. Chiropractic is no exception. Although we take every precaution, there are indeed some slight risks to chiropractic adjustment. The risk is very minor to almost nonexistent in any treatment of extremities. The risks involved in treatment to the spine excluding the neck are several. A list from the least to the most serious would include: muscular strain (rare), ligament sprain (rare), fractures (rare), and injury to intervertebral discs, nerves, or spinal cord (very rare). The risks involved in the treatment of the neck would include any on the proceeding list but also include the remote possibility of cerebrovascular injury, or stroke (very rare). A minority of patients may notice stiffness or soreness after the first few days of treatment (common). The ancillary therapy procedures could produce skin irritation, burns, or other minor complications (rare).

We do not offer to diagnose or treat any disease or condition other than joint restrictions or subluxations. However, if during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area. Regardless of the disease or condition, we do not offer to treat it specifically. Nor do we offer advice regarding treatment prescribed by others. Our only practice objective is to eliminate stress and interference to the expression of the body's innate wisdom. Our only method is treatment and chiropractic adjustments to restricted motion units.

Other treatment options that could be considered may include the following:

Over the counter analgesics: The risks of these medications include irritation to stomach, liver, kidneys, and other side effects in a significant number of cases.

Medical Care: Typically anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include numerous undesirable effects, usually more serious than those listed above, and the patient dependence in a significant number of cases.

Surgery: In conjunction with medical care adds the risks of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility and include chronic pain cycles. It is probable that delay of treatment will complicate the condition, and make future rehabilitation more difficult.

Concerns or Questions: Please ask your Doctor of Chiropractic. Be assured Aspen Chiropractic & Wellness has gone to great lengths to make your health and safety our top priority. We will be glad to explain any concern about treatment. We will only recommend treatment for you that we would feel comfortable having performed on ourselves.

Consent to Treat Minor Children: I _____, parent or legal guardian of _____ DOB ____/____/____

Do hereby consent to any chiropractic care and administration of x-rays, comprehensive exam and/or physical therapy to be necessary for the welfare of my child while said child is under the care of Aspen Chiropractic & Wellness.

Signature of Parent or Legal Guardian _____ Print Name _____

I have read the above explanation of Chiropractic Treatment. I also had the opportunity to ask questions and have them answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment, I have freely decided to undergo treatment, and hereby give my full consent to treatment.
